Associates of Reverse CSI Ltd. and Abel Danger—set up by myself and Field McConnell in 2006 as the cloud-centric crime-scene-investigation unit—believe Serco shareholders, including unwitting members of the Teachers' pension funds, and investment banker N M Rothschild & Sons Ltd., form the society to which the late President Kennedy referred as relying on "infiltration instead of invasion, ... guerrillas by night instead of armies by day... No expenditure is questioned, no rumor is printed, no secret is published."

With a Reverse CSI Scripts licence agreement, the "Teachers" could use A.I. deductive logic and in-house virtual reality theatre to protect their funds and, more importantly, expose the secret society of world bankers and intellectual elites hinted at in the late President John F. Kennedy's speech; a society which, I believe, hired Dave G. Sweigert and various Con Air SWAT teams to hack the Entrust federal bridge and link the University of Illinois EVL BAT CAVE to Northwestern University's IT Partnerships, including the BBC, so Bill Clinton's scriptwriters in Australia could attribute the 9/11 attacks to bin Laden groups.

 < Did Sweigert Tunnel Serco's Secre... ...

With nearly **40 years' experience as an AI mentor**, I have used my Reverse CSI Storyboards to identify the **Serco shareholders—including an EVL-network of AI Teachers—Resilience agents and investment banker N M Rothschild & Sons Ltd.**, with custody of AI patented devices apparently used by **Air Force veteran**, social engineer and ethical hacker **David Sweigert** to **tunnel split-scrubbed data needed by the U.S. Secret Service** and allied agencies to neutralize a white-list of EVL AI Teachers who allegedly trade in child and snuff-film pornography and bet on the times of victim deaths on a dead-pool federal bridge certification authority network built by Maxar Technologies for Starnet Communications in Vancouver, B.C.

The storyboards and recent news stories indicate that Serco and the CAI Private Equity Group agents launched a **split-tunnel attack** on the chain of custody of data which should have been collected by the Secret Service at WTC Twin Towers and Building 7 crime scenes in New York during and after 9/11.

The storyboards indicate that Serco/CAI agents used **Sweigert to tunnel the federal bridge** to conceal a Starnet gaming and child-porn blackmail ring in Vancouver, B.C. whose operators allegedly extorted Secret Service agents into standing down on 9/11 and, more recently, **through the 2017 knife attacks on London Bridge** and apparently deployed Con Air (JPATS)/JANET SWAT teams on the **Joint Automated Booking System (JABS)** to **scrub 'objectionable' web sites** which might expose decades of financial and electronic-based crimes linked to Serco's (formerly RCA GB 1929)

If you want to test the theory that Serco used a Canadian Aegis **Sweigert** Tunnel to decoy the USS Cole into a dockside ambush on October 12 2000 or knock a hole right through eight walls of the Penatgon on 9/11; check this
